

Project Description

Plans for Website:

- Show site visitors the positive and negative sides of fast food and organic food!
 - We explain how important healthy lifestyle is with some tasty recipes of organic food from us. Also, why fast-food is so popular in our society and how you can get away from eating fast food.
 - *The objective of this project:*
 - Plans for Json – Server:
 - add some recipes
 - make an import to be able to enter ingredients until you want to stop
 - check if the ingredients can be found in the recipes
 - if found give out the recipe with the most ingredients found

Insert some ingredients: (for example): Banana, Milk,

Output the recipe from Json Server with the most found ingredients

Banana shake, Banana cake, Banana bread, Banana cupcakes ...

Press at the recipe you want to pick

Preparation time: 5 minutes

Accessories needed: Mixer attachment

Ingredients needed: 2 bananas, peeled and halved
200ml of milk, 2.5ml vanilla flavour, 4 scoops of vanilla ice cream

Preparation: Add bananas milk, vanilla flavour, and vanilla ice cream to the blender jar and mix everything to level 1 or 2 until the ingredients are evenly mixed.

Output of picked recipe

Project – non – Goals:

- you won't be able to order food on our website
